

TEAM AGRO

“The Power of the Soil,
The Blessing of the Future”

ABOUT US

In 2014, we entered the industry to ensure the supply of industrial sugar for food producers. With the changes we made in our management and partnership structure in 2020, we expanded our portfolio to include raw materials such as corn, wheat, soybeans, sunflower seeds, soybean meal, and sunflower seed meal, focusing on commodity trading. Through this strategy, we increased our revenue 20-fold, strengthening our international commercial activities.

In line with our sustainability principles, we initiated investments such as constructing Turkey's largest "Geothermal Greenhouse" on a 150-acre area. Additionally, we expanded our operational scope by establishing a 20,000-square-meter "Customs Bonded Warehouse" at Mersin Port and licensed storage facilities with a capacity of 150,000 tons for domestic agricultural products, fulfilling our commitment to contributing to agriculture and sustainability.

As Team Agro, we remain determined to grow globally and enhance our interaction with industries through our initiatives geared toward the developing world.

"We continue to grow with our global supply network."

AREAS OF ACTIVITY

SUGAR

We Hold a Significant Market Share in Global Sugar Trade.

We guarantee sustainable trade with our expert and experienced team, meeting 75% of Turkey's imported sugar needs. By sourcing domestic market sugar from our producers and leveraging strong partnerships with the world's leading sugar manufacturers, we engage in the annual trade of approximately 500,000 tons of sugar. Through this, we provide our customers with high-quality ICUMSA 45 sugar and remain committed to delivering services at the highest standards in both domestic and international markets.
